CONTENTS OF VOLUME 122

NUMBER 1, 15 JUNE 1978

LAWRENCE, C. W. and CHRISTENSEN, R. B., Ultraviolet-induced Reversion of *cyc*1 Alleles in Radiation-sensitive Strains of Yeast. I. *rev*1 Mutant Strains . 1

PLAPP, B. V., EKLUND, H. and BRANDEN, C.-I., Crystallography of Liver Alcohol Dehydrogenase Complexed with Substrates 23

NOJIMA, H., HON-NAMI, K., OSHIMA, T. and NODA, H., Reversible Thermal Unfolding of Thermostable Cytochrome *c*-552 33

HUSE, Y., MITSUI, Y., IITAKA, Y. and the late MIYAKI, K., Preliminary X-ray Studies of the Interaction of Salmon Sperm DNA with Spermine . . 43

LAMVIK, M. K., Muscle Thick Filament Mass Measured by Electron Scattering . 55

PACHL, C. A. and YOUNG, E. T., The Size and Messenger RNA Activity of Bacteriophage T7 Late Transcripts Synthesized *in Vivo* 69

LETTERS TO THE EDITOR

CHIU, W. and HOSODA, J., Crystallization and Preliminary Electron Diffraction Study to 3·7 Å of DNA Helix-destabilizing Protein gp32*I . 103

LAUGHREA, M. and MOORE, P. B., Ribosomal Components Required for Binding Protein S1 to the 30 S Subunit of *Escherichia coli* . . 109

NUMBER 2, 25 JUNE 1978

BRÉGÉGÈRE, F., Bacteriophage P2–Lambda Interference. III. Essential Role of an Early Step in the Initiation of Lambda Replication . . . 113

BRAZHNIKOV, E. V. and CHIRGADZE, Y. N., The Use of Deuterium Exchange for the Study of the Distortion of α-Helices in Proteins 127

PENNICA, D. and COHEN, P. S., Regulation of Ribosome Function Following Bacteriophage T4 Infection 137

SUMMERTON, J. and BARTLETT, P. A., Sequence-specific Crosslinking Agents for Nucleic Acids. Use of 6-Bromo-5,5-dimethoxyhexanohydrazide for Crosslinking Cytidine to Guanosine and Crosslinking RNA to Complementary Sequences of DNA 145

Heidner, E. G., Frey, T. G., Held, J., Weissman, L. J., Fenna, R. E., Lei, M., Harel, M., Kabsch, H., Sweet, R. M. and Eisenberg, D., New Crystal Forms of Glutamine Synthetase and Implications for the Molecular Structure 163

Watenpaugh, K. D., Margulis, T. N., Sieker, L. C. and Jensen, L. H., Water Structure in a Protein Crystal: Rubredoxin at 1·2 Å Resolution . 175

Künzler, P. and Hohn, T., Stages of Bacteriophage Lambda Head Morphogenesis: Physical Analysis of Particles in Solution 191

Appendix: Künzler, P. and Lustig, A., Molecular Weight Determination of Labile Structures: A Variant of the Sedimentation-diffusion Method 212

Piper, P. W., A Correlation between a Recessive Lethal Amber Suppressor Mutation in *Saccharomyces cerevisiae* and an Anticodon Change in a Minor Serine Transfer RNA 217

Letters to the Editor

Mornon, J. P., Fridlansky, F., Surcouf, E., Bally, R. and Milgrom, E., X-ray Analysis of a Progesterone-binding Protein (Uteroglobin): Preliminary Results 237

Rosenberg, J. M., Dickerson, R. E., Greene, P. J. and Boyer, H. W., Preliminary X-ray Diffraction Analysis of Crystalline *Eco*RI Endonuclease 241

Earnshaw, W. C., King, J. and Eiserling, F. A., The Size of the Bacteriophage T4 Head in Solution with Comments about the Dimension of Virus Particles as Visualized by Electron Microscopy 247

Tsugita, A. and Hosoda, J., DNA Binding Site of the Helix Destabilizing Protein gp32 from Bacteriophage T4 255

Number 3, 5 July 1978

Ziemiecki, A. and Garoff, H., Subunit Composition of the Membrane Glycoprotein Complex of Semliki Forest Virus 259

Fralick, J. A., Studies on the Regulation of Initiation of Chromosome Replication in *Escherichia coli* 271

Kingsman, A. and Willetts, N., The Requirements for Conjugal DNA Synthesis in the Donor Strain During F*lac* Transfer 287

Ojala, D. and Attardi, G., Precise Localization of the Origin of Replication in a Physical Map of HeLa Cell Mitochondrial DNA and Isolation of a Small Fragment that Contains it 301

Draper, D. E. and von Hippel, P. H., Nucleic Acid Binding Properties of *Escherichia coli* Ribosomal Protein S1. I. Structure and Interactions of Binding Site I 321

Draper, D. E. and von Hippel, P. H., Nucleic Acid Binding Properties of *Escherichia coli* Ribosomal Protein S1. II. Co-operativity and Specificity of Binding Site II 339

Appendix: Determination of Co-operativity Parameters for Nucleic Acid Binding Proteins Using Oligonucleotides of Defined Length . 355

Calvet, J. P. and Pederson, T., Nucleoprotein Organization of Inverted Repeat DNA Transcripts in Heterogeneous Nuclear RNA–Ribonucleoprotein Particles from HeLa Cells 361

Letter to the Editor

Bishop, W. H., Interaction of Gonadotrophin Subunits: Thermodynamic Linkage of Proton Ionization to Subunit Association . . . 379

Number 4, 15 July 1978

Dubois, E., Hiernaux, D., Grenson, M. and Wiame, J-M., Specific Induction of Catabolism and its Relation to Repression of Biosynthesis in Arginine Metabolism of *Saccharomyces cerevisiae* 383

Monteilhet, C. and Blow, D. M., Binding of Tyrosine, Adenosine Triphosphate and Analogues to Crystalline Tyrosyl Transfer RNA Synthetase . 407

Piez, K. A. and Trus, B. L., Sequence Regularities and Packing of Collagen Molecules 419

Yuan, R. and Reiser, J., Steps in the Reaction Mechanism of the *Escherichia coli* Plasmid P15-specific Restriction Endonuclease 433

Privalov, P. L. and Filimonov, V. V., Thermodynamic Analysis of Transfer RNA Unfolding 447

Letter to the Editor

Filimonov, V. V. and Privalov, P. L., Thermodynamics of Base Interaction in $(A)_n$ and $(A \cdot U)_n$ 465

Index to Volume 122

$(A)_n$ and $(A \cdot U)_n$, thermodynamics of base interaction, 465
Adenosine triphosphate, tyrosine and analogues, binding to crystalline tyrosyl transfer RNA synthetase, 407
Alcohol dehydrogenase, liver, complexed with substrates, crystallography, 23
Alleles, *cyc*1, in radiation-sensitive strains of yeast, ultraviolet-induced reversion, 1
Arginine catabolism induction in *Saccharomyces cerevisiae* and its relation to repression of biosynthesis, 383
Attardi, G. (see also Ojala, D.), 301
$(A \cdot U)_n$ and $(A)_n$, thermodynamics of base interaction, 465

Bacteriophage lambda head morphogenesis: physical analysis of particles in solution, 191
— P2-lambda interference: essential role of an early step in the initiation of lambda replication, 113
— T4, DNA binding site of the helix destabilizing protein gp32, 255
— — T4 head size in solution, with comments about the dimension of virus particles as visualized by electron microscopy, 247
— — infection and the regulation of ribosome function, 137
— T7, size and messenger RNA activity of late transcripts synthesized *in vivo*, 69
Bally, R. (see also Mornon, J. P.), 237
Bartlett, P. A. (see also Summerton, J.), 145
Base interaction thermodynamics for $(A)_n$ and $(A \cdot U)_n$, 465
Binding properties of *Escherichia coli* ribosomal protein S1, co-operativity and specificity of binding site II, 339
— — — — — — — —, structure and interactions of binding site I, 321
— of protein S1 to the 30 S subunit of *Escherichia coli*, ribosomal components required, 109
— site, DNA, of the helix destabilizing protein gp32 from bacteriophage T4, 255
— of tyrosine, adenosine triphosphate and analogues to crystalline tyrosyl transfer RNA synthetase, 407
Bishop, W. H., Interaction of gonadotrophin subunits: thermodynamic linkage of proton ionization to subunit association, 379
Blow, D. M. (see also Monteilhet, C.), 407
Boyer, H. W. (see also Rosenberg, J. M.), 241
Branden, C.-I. (see also Plapp, B. V.), 23
Brazhnikov, E. V. & Chirgadze, Y. N., The use of deuterium exchange for the study of the distortion of α-helices in proteins, 127
Brégégère, F., Bacteriophage P2-lambda interference. III. Essential role of an early step in the initiation of lambda replication, 113
6-Bromo-5,5-dimethoxyhexanohydrazide, use for crosslinking cytidine to guanosine and crosslinking RNA to complementary sequences of DNA, 145

Calvet, J. P. & Pederson, T., Nucleoprotein organization of inverted repeat DNA transcripts in heterogeneous nuclear RNA-ribonucleoprotein particles from HeLa cells, 361
Catabolism induction, specific, and its relation to repression of biosynthesis in arginine metabolism of *Saccharomyces cerevisiae*, 383
Chirgadze, Y. N. (see also Brazhnikov, E. V.), 127
Chiu, W. & Hosoda, J., Crystallization and preliminary electron diffraction study to 3·7 Å of DNA helix-destabilizing protein gp32*I, 103
Christensen, R. B. (see also Lawrence, C. W.), 1
Chromosome replication in *Escherichia coli*, studies on the regulation of initiation, 271
Cohen, P. S. (see also Pennica, D.), 137
Collagen molecules, sequence regularities and packing, 419
Conjugal DNA synthesis in the donor strain during F*lac* transfer, 287
Co-operativity and specificity of binding site II of *Escherichia coli* ribosomal protein S1, 339
— parameter determination for nucleic acid binding proteins using oligonucleotides of defined length, 355
Crosslinking agents, sequence-specific, for nucleic acids: use of 6-bromo-5,5-dimethoxyhexanohydrazide for crosslinking cytidine to guanosine and crosslinking RNA to complementary sequences of DNA, 145

Crystal forms, new, of glutamine synthetase and implications for the molecular structure, 163
Crystalline *Eco*RI endonuclease, preliminary X-ray diffraction analysis, 241
— tyrosyl transfer RNA synthetase and the binding of tyrosine, adenosine triphosphate and analogues, 407
Crystallization and preliminary electron diffraction study to 3·7 Å of DNA helix-destabilizing protein gp32*I, 103
Crystallography of liver alcohol dehydrogenase complexed with substrates, 23
*cyc*1 alleles in radiation-sensitive strains of yeast, ultraviolet-induced reversion, 1
Cytidine crosslinking to guanosine using 6-bromo-5,5-dimethoxyhexanohydrazide; sequence-specific crosslinking agents for nucleic acids, 145
Cytochrome *c*-552, thermostable, reversible thermal unfolding, 33

Dehydrogenase for liver alcohol complexed with substrates, crystallography, 23
DNA binding site of the helix destabilizing protein gp32 from bacteriophage T4, 255
— helix-destabilizing protein gp32*I, crystallization and preliminary electron diffraction study to 3·7 Å, 103
—, mitochondrial, HeLa cell, precise localization of the origin of replication in a physical map and isolation of a small fragment that contains it, 301
—, RNA crosslinking to complementary sequences using 6-bromo-5,5-dimethoxyhexanohydrazide, 145
— of salmon sperm, preliminary X-ray studies of its interaction with spermine, 43
— synthesis, conjugal, in the donor strain during F*lac* transfer, 287
— transcripts, repeat, inverted, in heterogeneous nuclear RNA-ribonucleoprotein particles from HeLa cells, nucleoprotein organization, 361
Deuterium exchange, use for the study of the distortion of α-helices in proteins, 127
Dickerson, R. E. (see also Rosenberg, J. M.), 241
Draper, D. E. & von Hippel, P. H., Nucleic acid binding properties of *Escherichia coli* ribosomal protein S1. I. Structure and interactions of binding site I, 321
— & —, — — — — — — — — — — —. II. Co-operativity and specificity of binding site II, 339
Dubois, E., Hiernaux, D., Grenson, M. & Wiame, J-M., Specific induction of catabolism and its relation to repression of biosynthesis in arginine metabolism of *Saccharomyces cerevisiae*, 383

Earnshaw, W. C., King, J. & Eiserling, F. A., The size of the bacteriophage T4 head in solution with comments about the dimension of virus particles as visualized by electron microscopy, 247
*Eco*RI endonuclease, crystalline, preliminary X-ray diffraction analysis, 241
Eisenberg, D. (see also Heidner, E. G.), 163
Eiserling, F. A. (see also Earnshaw, W. C.), 247
Eklund, H. (see also Plapp, B. V.), 23
Electron diffraction study to 3·7 Å, preliminary, and crystallization of DNA helix-destabilizing protein gp32*I, 103
— microscopic visualization of virus particles, comments about their dimension; the size of the bacteriophage T4 head in solution, 247
— scattering measurements of muscle thick filament mass, 55
Escherichia coli plasmid P15-specific restriction endonuclease, steps in the reaction mechanism, 433
— —, ribosomal components required for binding protein S1 to the 30 S subunit, 109
— — — protein S1, co-operativity and specificity of binding site II, 339
— — — — —, structure and interactions of binding site I, 321
— —, studies on the regulation of initiation of chromosome replication, 271

Fenna, R. E. (see also Heidner, E. G.), 163
Filament, thick, of muscle, electron scattering measurements of its mass, 55
Filimonov, V. V. & Privalov, P. L., Thermodynamics of base interaction in $(A)_n$ and $(A \cdot U)_n$, 465
— (see also Privalov, P. L.), 447
F*lac* transfer and the requirements for conjugal DNA synthesis in the donor strain, 287
Fralick, J. A., Studies on the regulation of initiation of chromosome replication in *Escherichia coli*, 271
Frey, T. G. (see also Heidner, E. G.), 163
Fridlansky, F. (see also Mornon, J. P.), 237

Garoff, H. (see also Ziemiecki, A.), 259
Glutamine synthetase, new crystal forms; implications for the molecular structure, 163
Glycoprotein complex of Semliki Forest virus membrane, subunit composition, 259
Gonadotrophin subunit interaction: thermodynamic linkage of proton ionization to subunit association, 379
gp32 helix-destabilizing protein from bacteriophage T4, DNA binding site, 255
gp32*I, DNA helix-destabilizing protein, crystallization and preliminary electron diffraction study to 3·7 Å, 103
Greene, P. J. (see also Rosenberg, J. M.), 241
Grenson, M. (see also Dubois, E.), 383
Guanosine, use of 6-bromo-5,5-dimethoxyhexanohydrazide for crosslinking cytidine; sequence-specific crosslinking agents for nucleic acids, 145

Harel, M. (see also Heidner, E. G.), 163
Head morphogenesis of bacteriophage lambda: physical analysis of particles in solution, 191
— of bacteriophage T4, size in solution, with comments about the dimension of virus particles as visualized by electron microscopy, 247
Heidner, E. G., Frey, T. G., Held, J., Weissman, L. J., Fenna, R. E., Lei, M., Harel, M., Kabsch, H., Sweet, R. M. & Eisenberg, D., New crystal forms of glutamine synthetase and implications for the molecular structure, 163
HeLa cell mitochondrial DNA replication, precise localization of its origin in a physical map and isolation of a small fragment that contains it, 301
— cells, nucleoprotein organization of inverted repeat DNA transcripts in heterogeneous nuclear RNA-ribonucleoprotein particles, 361
Held, J. (see also Heidner, E. G.), 163
α-Helices in proteins, use of deuterium exchange for the study of their distortion, 127
Helix-destabilizing protein gp32 from bacteriophage T4, DNA binding site, 255
— — — gp32*I, crystallization and preliminary electron diffraction study to 3·7 Å, 103
Hiernaux, D. (see also Dubois, E.), 383
Hohn, T. (see also Künzler, P.), 191
Hon-Nami, K. (see also Nojima, H.), 33
Hosoda, J. (see also Chiu, W.), 103
— (see also Tsugita, A.), 255
Huse, Y., Mitsui, Y., Iitaka, Y. & the late Miyaki, K., Preliminary X-ray studies of the interaction of salmon sperm DNA with spermine, 43

Iitaka, Y. (see also Huse, Y.), 43
Induction, specific, of catabolism and its relation to repression of biosynthesis in arginine metabolism of *Saccharomyces cerevisiae*, 383
Initiation of chromosome replication in *Escherichia coli*, studies on regulation, 271

Jensen, L. H. (see also Watenpaugh, K. D.), 175

Kabsch, H. (see also Heidner, E. G.), 163
King, J. (see also Earnshaw, W. C.), 247
Kingsman, A. & Willetts, N., The requirements for conjugal DNA synthesis in the donor strain during F*lac* transfer, 287
